

Why Al-Sadeer Laboratory?

Al-Sadeer Laboratory ensures quality and cost-effective medical lab services based on the following benefits:

- ▶ **Conveniently located** in Baghdad, serving all areas 24/7 with mobile lab capabilities.
- ▶ **Mobile teams** available for remote and austere areas maintaining the same level of quality standards. Our mobile teams can be mobilized to various sites at the same time within a 24-hour notice.
- ▶ **Mobile X-Ray Machines** are available for use with our mobile teams.
- ▶ **Professional trained and English speaking** technical staff team.
- ▶ Use of **automated analyzer systems** for sample screenings for fast and efficient reporting. Manual testing available if required.
- ▶ Established **safety and health** measures ensuring the protection of our employees, customers and the public.
- ▶ **Access to vaccines** (Hepatitis A, B & Typhoid) from global sources when not available in Iraq.
- ▶ **Continual Training** on all systems and processes for up-to-date sample testing and reporting methods.
- ▶ **Quality Control** methods and processes to meet the highest of standards and accuracy of results.
- ▶ **Provide over 100 accurate reports per day** with our skilled administrative and translation staff who collect samples, review data and provide results.
- ▶ Thorough **understanding of client requirements**.

Our entire team at Al-Sadeer Clinical Laboratory is dedicated to providing excellent and personalized care and service to give our clients the best possible screening, tests and results.

Al-Sadeer Clinical Laboratory Services

Al-Sadeer Clinical Laboratory is an Iraqi owned and operated lab offering medical screening and diagnostic testing designed to meet your requirements. Understanding that time is of the essence in getting accurate results, we maintain highly trained, experienced personnel and quality on-site testing equipment.

We offer:

- ▶ Convenient location in Baghdad and mobile lab services to remote areas such as Basrah, Tickrit, Kalsu(Hilla), Taji and Erbil with our mobile capabilities.
- ▶ Highly professional staff experienced in pathology analysis, sample analysis, and quality control.
- ▶ Assurance of workplace safety measures protecting the safety and health of our employees, customers and the public at all times.
- ▶ Proven successes with over 2,000 accurate test and results including 1,100 in Baghdad and over 1,000 with our mobile teams at various locations throughout Iraq.
- ▶ 24 hours a day, seven days a week hours of operation.

Our customers include physicians and their patients, hospitals, private companies and government entities. We provide timely, high-quality and cost-effective laboratory tests and services enabling our clients to make effective decisions which are guided by these lab test results.

Facility Equipment

The chain of custody of all samples is properly maintained and test results are quickly and efficiently produced for timely reporting using our on-site medical lab equipment. All analyzing instruments are calibrated and tested at the start of each day according to protocol to ensure optimal equipment operations. Should a machine become inoperable, it is replaced within 24 hours to minimize any downtime.

Our testing equipment includes:

- ▶ Clinical Chemistry Analyzer
- ▶ Mini VIDAS® Analyzer
- ▶ Hematology Analyzer
- ▶ Manual Testing

Quality Control

Al-Sadeer's technical team is responsible for all Quality Control (QC) measures that are designed to identify, reduce, correct and eliminate any deficiencies in our laboratory's internal analytical processes prior to the release of patient results. As part of our internal QC continuous improvement process, we send random samples to other professional labs to verify our accuracy and standards for the quality of the results reported. We use automated systems which provide the proper reproduction of these results over time and/or varying operating conditions.

Our QC methods include:

- ▶ Meeting education and training criteria for all staff members.
- ▶ Ensuring all health and safety measure are followed.
- ▶ Maintaining accurate patient identification for correct sample collection.
- ▶ Utilization of proper sterile specimen collection procedures.
- ▶ Optimizing instrument operations through calibration and regular testing.
- ▶ Verifying test materials to validate expiration dates.
- ▶ Providing oversight to ensure precise interpretation results.

Safety, Health and Environmental

At Al-Sadeer Laboratory we take safety, health, and environmental concerns very seriously.

- ▶ Each staff member is trained to ensure workplace safety measures are taken to protect the safety and health of our employees, customers and the public.
- ▶ From basic workplace safety measures to the proper handling of biohazard materials, all employees have a thorough understanding of the risk or potential risk to the health of humans, animals and the environment.
- ▶ Protocol for the proper handling and disposal of materials are constantly maintained.
- ▶ We continually develop and enhance our process controls for improvements in our services.
